10x TBS Buffer

Product	Volume	Cat. No.
10x TBS Buffer	1 L	EBA-1101

Description.

Elpis Biotech's 10x TBS (Tris-Buffered-Saline Buffer) is used for western analysis. TBS was originally used at a working strength of 0.5x or 1x for western analysis. Premixed buffers eliminate variables which can distort data and give unreliable results.

10x Composition

0.2 M Tris-HCl,
1.37 M NaCl
pH at 25°C (1x): 7.6

Recommended Storage Condition

Store at room temperature (22-25°C)

Usage Information (applications)

Western analysis

Caution

Not for diagnostic use. The safety and efficacy of this product in diagnostic or other clinical uses has not been established.
