## 10x TE Buffer (pH8.0)

Product	Volume	Cat. No.
10x TE Buffer (pH8.0)	100 ml	EBA-1200

### Description.

Elpis Biotech's 10x TE (Tris-EDTA Buffer) is used for nucleic acid reconstitution. TE was originally used at a working strength of 0.1x or 1x for nucleic acid reconstitution. Premixed buffers eliminate variables which can distort data and give unreliable results.

### 10x Composition

100 mM Tris-Cl  
0.01 M EDTA  
pH at 25°C (1x): 8.0

### Recommended Storage Condition

Store at room temperature (22-25°C)

### Usage Information (applications)

Nucleic acid reconstitution

### Caution

Not for diagnostic use. The safety and efficacy of this product in diagnostic or other clinical uses has not been established.
